# Reclassification of Codes

# Code Structure

- Category
  - This is made up of the first three characters
- Subcategory
  - This is made up of the 4<sup>th</sup> and/or 5<sup>th</sup> characters

- Code
  - A code is anything that has no further subdivision
  - ie, a category or subcategory can be a code if not further subdivided

# What does this all mean for us?

- There are many more codes for each diagnosis than before.
- More specific information will be needed to find the correct, most specific code available
- Some codes will require additional codes to fully describe the condition

# How to obtain the ICD10 codes?

- There is a free website for converting ICD9 to ICD10 code
  - [www.icd10data.com](http://www.icd10data.com)
- This will allow you to enter the ICD9 code and give you the equivalent ICD10 code or codes
- If there is more than one code in the ICD10 database for the ICD9 code you are trying to convert, the healthcare provider will have to make the determination of the correct code.

# Entry into ROCS system

- When the ICD10 code is entered into the ROCS system, the period is left out of the code. When noting the code anywhere in the clients records this period should ALWAYS be included
  - Code S42.265A would be entered as S42265A

# However, they are entertaining

- W58.13 Crushed by crocodile
- X05 Melting of pajamas due to fire
- V93.83 Carbon monoxide poisoning from jet skis
- W88.1 Radiation exposure to gamma rays
- X73.2 Suicide attempt by machine gun
- X35 Victim of volcanic eruption
- Y92.59 Injury occurred at television station
- Y65.51 Wrong operation performed on correct patient
- Y65.53 Correct procedure performed on wrong side of body
- Y65.62 Operation performed on patient not scheduled for surgery
