### **PRESENTER**

**Samantha Orbach, Psy. D.  
Children's Research Triangle**

The following objectives will be addressed:

- ❖ Understand general brain development
- ❖ Understand neurobiological consequences of environmental trauma
- ❖ Gain insight into students' behavioral presentation through a trauma lens of neurobiological impact
- ❖ Learn to integrate a new mindset and methods to best support children in the school environment, especially through a lens of building relationships and empathy

**Please RSVP by  
May 7, 2018  
(Space is limited)**
