

Entering Program Codes When Using Software (e.g. EDI Claims Link or Direct Data Entry) developed by the Collaborative

Due to the different means of inputting bills in the system that the Collaborative has designed for DMH (e.g. EDI Claims Link or Direct Data Entry), when inputting multiple claims for a single consumer, please remember that you will need to be alert to ensure that the appropriate program code is applicable for the claim submitted. Note that each time the program changes, you will need to exit from the line claim screen to enter the appropriate program code. Please note that program codes are required.
