Community Expansion under PA 09-0104/SB 0026
("SMHRF Comparable Services")

October 23, 2013

DHS/DMH REQUEST FOR INFORMATION

Context and Background

On July 22, 2013 Governor Pat Quinn signed Senate Bill 26, creating Public Act 098-0104. Section 1-101 states that this Act may be cited as the Specialized Mental Health Rehabilitation Act of 2013.

Section 1-101.3 states that “Facilities licensed under this Act will be multi-faceted facilities that provide **triage** and **crisis stabilization** to inpatient hospitalization, provide stabilization for those in **post crisis stabilization**, and provide **transitional living assistance** to prepare those with serious mental illness to reintegrate successfully into community living settings.” [emphasis added] Language in Section 1-101.5 “provides for licensure of long term care facilities that are federally designated as an Institute for Mental Disease” (IMD). There are 24 facilities in Illinois that are impacted by this Act which are listed in Appendix A. These facilities will be referred to as SMHRF’s (Specialized Mental Health Rehabilitation Facilities) throughout this document.

Section 6-104.3 of this Act contains language regarding **comparable programs**. Specifically, it requires the Department of Human Services/Division of Mental Health to oversee the creation of comparable programs to be provided by community-based providers. (The full text of this section can be found in Appendix B.) This Request for Information (RFI) seeks proposals from DHS/DMH contracted community providers, in the geographic areas of the SMHRF’s, for the comparable programs outlined later in this document. Maps of the specific geographical areas targeted in this RFI are in Appendix C and D. Appendices E, F and G provide maps and a listing of hospitals with psychiatric units

The Development Process

The DHS/Division of Mental Health, in collaboration with the Governor’s Office and other State Departments, worked to identify needed comparable programs using the following principles: 1) build upon work previously completed; 2) include a broad array of stakeholders in the process; 3) use data to inform the development; and 4) consider programs that provide increased choice for consumers.

Building upon work previously completed, DHS/DMH reviewed the following two documents for relevancy and guidance:

A. Illinois Mental Health 2013-2018 Strategic Plan

The Illinois Mental Health Strategic Plan (<http://www.dhs.state.il.us/page.aspx?item=62230>) developed in December 2012 was created by DHS/DMH and numerous stakeholders. The following principles were adopted as relevant to guide the design of comparable programs:

- Funding for mental health services is appropriate to meet the needs and priorities within state budgetary constraints. All additional sources of funding (federal, private insurance, etc.) are maximized.

DHS/DMH REQUEST FOR INFORMATION

- Services for individuals of all ages with mental health conditions are person-centered, strengths-based, trauma informed, and culturally competent. Services are founded on evidence-based, evidence-informed, best and emerging promising practices.
- Services are flexible, tailored, and provided in the least restrictive setting appropriate to the individual's needs.
- The direct involvement of individuals with lived experience of mental illnesses, and of family members of children and adolescents with emotional disorders, guides the planning, provision, and monitoring of mental health services.

Also identified from the Strategic Plan were the following priorities, goals and objectives:

Strategic Priority # 7: Ensure that hospitalization and institutional care, when necessary, is available to meet demand now and in the future.

Goal 1: Ensure that hospitals, residential and other treatment facilities serving individuals with mental illness deliver services in a recovery-oriented manner with clear plans and “pathways” for discharge.

Short term objectives:

1. Reduce the rate of psychiatric hospitalizations and re-hospitalizations through greater use of community crisis intervention teams and the development of short-term sub-acute units in non-hospital residential treatment settings.
2. Provide more effective transition from residential settings to the community with more deliberate and planned community living skills training before transition (such as promote “doing with” interventions rather than “doing for” interventions, such as training a person with diabetes in illness self-management rather than managing it for that person) and with better linkages between community agencies and residential treatment settings. Ensure greater integration of recovery-oriented approaches into residential treatment settings.

Goal 2: Assess the current role of existing residential and other treatment facilities and enhance the effectiveness, efficiency, and coordination of the service system by encouraging and facilitating new roles and responsibilities for key components of the system.

Short term objectives:

1. Develop a plan to build on the relationships that exist between facilities and other community providers to create joint treatment approaches, discharge planning.

DHS/DMH REQUEST FOR INFORMATION

2. Explore expansion of focus of transitional housing sites beyond just homeless individuals to include individuals with mental illness needing housing until a more permanent housing situation can be secured.
3. Explore and plan for incorporation of 72-hour clinic observation beds for stabilization and expedient referral to the most appropriate treatment site from hospital emergency departments.

B. Human Service Commission Report Recommendations on Rebalancing Long Term Care

The following recommendations were considered as being relevant to our work

(<http://www2.illinois.gov/hsc/Pages/default.aspx>):

Recommendation 1: Develop a communication and public information campaign to build a broader community consensus on the importance of Rebalancing Long-term Care for Illinois.

Recommendation 2: Compile a Comprehensive Rebalancing Strategic Work plan incorporating individual plans, transition goals and outcomes, strategies, financial resources, and timelines.

Recommendation 3: Develop a plan to build community capacity and service delivery that outlines strategies to meet service and support needs of individuals with disabilities living in the community.

Recommendation 4: Develop a strategic plan to clearly identify the housing needs and goals, the resource allocations, the accomplishments to date and gaps in the systems, and the strategies to fill the gaps across the Rebalancing Initiatives.

Recommendation 5: The State and stakeholders should conduct, and report on, an analysis to determine benefits, costs and impact on Rebalancing of adopting and implementing enhancements to expand coverage and streamline payment processes under the existing and new home and community based service options for individuals transitioning under eligible Rebalancing Initiatives.

Recommendation 6: State agency, managed care entities, and providers as identified by the State of Illinois must coordinate implementation of managed care to clearly demonstrate the roles and responsibilities, service components for individual coverage, and opportunities for improved outcomes created under coordinated care.

Stakeholder Input

A broad array of stakeholder input was solicited consisting of representatives from consumers who had lived in long term care facilities, DHS contracted community providers, trade associations, managed care

DHS/DMH REQUEST FOR INFORMATION

entities, community hospital discharge planners, DMH Pre-Admission Screeners (PAS), labor and state departments (Appendix H:). Specific information was obtained on the type of programs needed to meet the objectives of the language of the Act.

Input was received both from focus groups and community providers. These meetings were instructive in identifying key issues and service needs. A summary of each discussion follows:

Major Findings from August 20, 2013 Focus Group of Former Nursing Home Mental Health Consumers

1. Few were asked or given choice between admission to nursing facility or an alternative; all passively agreed
2. Many felt their stay at nursing facility helped them to become more stabilized but would have preferred more community-based settings
3. Services needed in the community:
 - Peer support and socialization opportunities (people to talk to)
 - Transitional residential settings
 - Job support/coaching
4. Biggest challenges living in the community:
 - Transportation (e.g., getting to the store)
 - Assimilating back to society; time-warp (time lost); do not know what is going on and how to fit in
 - Loneliness; not knowing how to branch out; want to hang out with “normal people”

Major Findings from August 21, 2013 Focus Group of Pre-Admission Screeners (PAS)

1. Primary reason for referral to nursing homes is lack of a residence that provides high level of support and continuing need for stabilization
2. Medication and service non-compliance a precipitating factor for many hospitalizations
3. Although many individuals are beyond their first episode of mental illness, they are not linked to any provider or system, due to insufficient follow-up and linkage to outpatient services
4. Identified following needs:
 - more assertive outreach and bringing services to the consumer;
 - short term emergency housing (many consumers are homeless or cannot return to prior living situation); dual diagnosis substance use services, especially residential that is longer than 28 days that includes assistance in skill development and housing search;
 - longer term mental health residential treatment with 24 hour supervision; community provider stationed at emergency department to direct some individuals to crisis beds with mobile follow-up;
 - Triage Center in emergency department

DHS/DMH REQUEST FOR INFORMATION

Major Findings from August 30, 2013 Focus Group of Hospital Discharge Planners

1. Relatively few individuals are experiencing their first psychiatric episode or hospitalization
 - Estimated 50% have substance use issues, and
 - Of those, 25-30% need primary substance use services
2. Need to have post-hospital options for placement/housing
3. Would be helpful to have post-discharge providers do their “intake” and meet the individual before discharge from the hospital
 - Should not place these individuals on “waiting lists” for community services
4. Need for more supervision of the individuals post-discharge
 - Follow-up to ensure keep appointments, get and take medications
 - Intervene prior to any problematic issues arising or decompensation
5. Estimate that approximately 30% will still need longer term care even with more robust community placements and services available, i.e., these individuals need longer term stabilization
 - Would be useful to have placement option available that is between outpatient community services in Permanent Supportive Housing and long-term institutional care
6. A triage center within or near the hospital to permit additional observation of the individual to assess their real needs would be helpful

Needed Services Identified from SMHRF Community Meeting Group:

- Housing and housing subsidies, Housing First Model;
- Transitional housing that is immediately available, provides short term housing, skill development, staff available on-site 24 hours, example given was Interfaith House Respite Care;
- Model of Substance Abuse Recovery Homes where individuals may leave during the day to attend treatment, licensed/regulated Recovery Homes, capable to address mental health issues in addition to substance use issues;
- Strong relationship between hospitals and community providers to enhance referring to community options, hospitals are primary intercept point;
- Co-location of provider at hospital EDs to assess for appropriateness for alternative treatment settings;
- Community based triage centers and Living Room models operated by peers;
- Length of stay in DMH residential programs should be determined by individual needs.

The group prioritized these needs as follows:

1. Make housing options more readily available (transitional, permanent)
2. Community linkages with the hospitals
3. Improve effective utilization of crisis residential beds

DHS/DMH REQUEST FOR INFORMATION

4. On a longer time frame, develop community triage centers

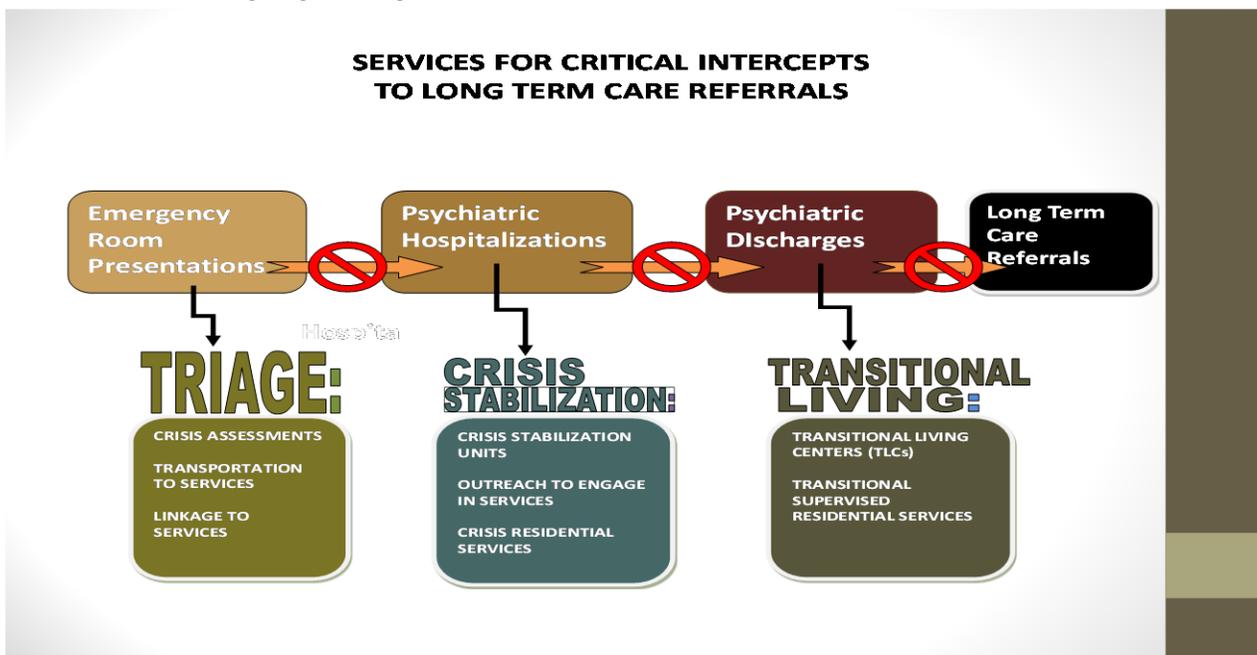

In addition, DHS/DMH utilized three types of data to inform the process. Information was obtained regarding psychiatric admissions, psychiatric presentations in emergency rooms, and admissions into nursing facilities. A summary of this data is included in Appendices I, J, K, L, M and N.

Sequential Intercept Analysis

To identify the crucial areas for infrastructure and service development, DHS/DMH utilized the sequential intercept model. That is, data were analyzed to understand the trajectory experienced by consumers on their path to long term care and to identify the optimal opportunities for diversion or deflection to community-based services. From this analysis, two critical intercepts emerged: 1) hospital psychiatric discharges (74% of PAS/RR evaluations were referred by private hospital psychiatric units) which lead to referrals to long term care facilities; and 2) psychiatric presentations to hospital emergency rooms which lead to psychiatric unit admissions.

As a result, DHS/DMH has identified several areas for development, which are the focus of this RFI. These areas include the development of new services and supports to intercede with individuals that would likely otherwise be referred into the long term care system. While responses to provide individual services or supports identified will be considered, it is believed that the most effective proposals will be those that address the full array of services and supports needed in a systematic way. Thus, respondents are encouraged to collaborate with other providers within their community to propose a system of care to address the triage, crisis stabilization and transitional living needs of that community.

These programs will be considered as pilots and will be evaluated on an ongoing basis to determine effectiveness for ongoing funding.

DHS/DMH REQUEST FOR INFORMATION

SERVICES/PACKAGES TO BE PURCHASED UNDER THIS RFI

I. TRIAGE

- A. CRISIS ASSESSMENT AND LINKAGE TO SERVICES:** For individuals presenting at emergency departments in a geographically selected area, the agency will provide skilled crisis assessment and intervention that includes the identification of ongoing care needs of the individual and linkage to the appropriate provider(s) of services. This will most likely require the development of partnerships with other service providers within the area.

To be eligible for this service, at the point of contact, the individual must be in an emergency department within the covered geographic area, experiencing a psychiatric crisis or at risk of psychiatric crisis, and in need of immediate intervention to prevent the need for hospitalization related to the crisis. For this purpose, a psychiatric crisis is defined as the acute exacerbation of symptoms related to a diagnosis or suspected diagnosis of serious persistent mental illness, which is resulting in the loss of previous level of functioning.

- B. TRANSPORTATION BETWEEN LEVELS OF CARE:** In managing and coordinating services for an individual immersed in a mental health crisis or potential crisis, transportation to the most appropriate site for services or supports may be necessary. Providers are encouraged to seek and employ the least intrusive and least expensive method of safe transportation possible. For some individuals who have become sufficiently stabilized this may mean the use of family or friends to drive or escort the individual on public transportation, or the payment of bus or cab fare for the individual. For other individuals and situations, however, a safer and more secure method of transportation may be required.

DMH is interested in purchasing transportation services that are: 1) focused on individualized, person-centered services in a safe and dignified, medically appropriate, high quality manner; 2) designed to accommodate the voluntary transport of consumers for the purpose of intervening in a mental health crisis or potential crisis at the earliest opportunity possible to minimize exacerbation of symptoms and problems for the individual as well as system reliance on more restrictive and expensive services; and 3) guided by tenets of trauma-informed care.

II. CRISIS STABILIZATION

- A. DISCHARGE LINKAGE AND COORDINATION OF SERVICES:** For individuals being discharged from psychiatric units of community hospitals, the agency will provide immediate access to

DHS/DMH REQUEST FOR INFORMATION

all recommended services, and will provide assertive outreach for any individual that fails to appear for an initial discharge linkage appointment.

To be eligible for this service, the individual must be receiving services in a psychiatric unit of a community hospital within the selected geographic area, or DMH State Hospital, must live within the specified geographic service area of the community agency, must be in need of ongoing outpatient mental health care for symptoms related to a serious persistent mental illness as defined within the DHS/DMH provider manual, and must have either no previous engagement with a mental health treatment provider or have a history of failed appointments with a mental health provider.

B. OUTREACH TO INDIVIDUALS TO ENGAGE IN SERVICES: Individuals who are unengaged from services can be considered to be in the Pre-Contemplation Stage of recovery. They may lack awareness or understanding of their illness, recovery concepts or how personal behavior may contribute to the course of illness. In addition, their inability to develop trusting relationships may prevent them from engaging in recovery or treatment. To increase the likelihood of engagement, the provider who has received a referral through either crisis contact or hospital discharge will actively engage individuals in a trusting relationship in an effort to facilitate their participation in mental health services. This will include an attempt at outreach to the individual within 24 hours of the referral from crisis evaluation or hospital discharge. As long as it remains clear that the individual continues to suffer from serious mental illness, attempts at establishing a trusting relationship will continue for at least three months. The agency will ensure that staff providing these outreach services have been appropriately and adequately trained and assessed for competency in engagement techniques.

C. RESIDENTIAL CRISIS BEDS: DHS/DMH currently funds a number of supervised crisis residential settings for individuals experiencing a psychiatric crisis and in need of 24 hour services and supports. Proposals for expansion of this type of treatment setting will also be considered. Such programs should be designed to provide 24 hour supervision and access to comprehensive crisis intervention services including access to psychiatric and nursing care.

To be eligible for this level of treatment, the individual must have a diagnosis of mental illness as defined in Rule 132, be experiencing acute exacerbation of psychiatric symptoms, in need for assessment and treatment within a structured, supervised, therapeutic environment and must be in need of 24 hour services and support as indicated by a LOCUS level of care recommendation of 5 (Medically Monitored Residential Services).

III. TRANSITIONAL LIVING

A. TRANSITIONAL LIVING CENTERS (TLC): for individuals meeting clinical eligibility criteria described below, and who lack a safe living environment, the provider will create these

DHS/DMH REQUEST FOR INFORMATION

locations which will provide housing for no more than 16 individuals at a time, with access to treatment services and supports necessary to the individual's recovery. Referral into a TLC would require authorization, with an anticipated length of stay of three months or less. In the event that an individual's stay needed to go beyond three months, concurrent authorizations would be required. Because the program is transitional in nature, it is expected that the focus is on assisting the individual in securing a permanent living arrangement as soon as possible, given the individual's particular situation. The provider is also expected to take the opportunity to engage the individual in developing and implementing a plan of care to address the individual's mental health needs and wellness goals. Individuals served in this setting are not expected to require 24 hour supervision, but there should be staff on-site 24/7 to assist with non-clinical support needs. Due to the nature of services and supports to be provided, DHS/DMH anticipates that the majority of rehabilitative treatment in the TLC will be provided by individuals credentialed or eligible and working towards credential as Certified Recovery Support Specialists (CRSS).

To be eligible for TLC, the individual must be diagnosed with a serious persistent mental illness as defined by the DHS/DMH provider manual, must be homeless or most recently have been living in conditions which are not considered safe/conducive to mental health recovery, must be in need of mental health services and supports, and must be willing to engage in recommended treatment with the provider agency. In addition, the individual must meet the LOCUS level of care recommendation of 3 (high intensity community based services).

- B. TRANSITIONAL SUPERVISED RESIDENTIAL SETTINGS:** DHS/DMH currently funds a number of supervised residential settings for individuals in need of 24 hour services and supports in a supervised living arrangement. Proposals for expansion of this type of treatment setting will also be considered. As with the TLC described above, such programs should be designed with a transitional philosophy, with a focus on assisting the individual in developing the skills necessary to transition to permanent supportive housing, and assisting with that transition as soon as the individual's needs allow for this to occur.

To be eligible for this level of treatment, the individual must be diagnosed with a serious persistent mental illness as defined by the DHS/DMH provider manual, and must be in need of 24 hour services and supports as indicated by a LOCUS level of care recommendation of 5 (Medically Monitored Residential Services).

DHS/DMH REQUEST FOR INFORMATION

Required Information in Proposal to RFI

1. Identifying Information on lead agency and all partners in the proposal
 - a. Names and addresses of each agency
 - b. Addresses of each agency Identified project lead for each agency
 - c. Specific Services proposed to be provided by each agency

2. Financial stability of the lead agency and all partners in the proposal
 - a. General assessment of the financial stability of organization(s) and its ability to sustain operations into the future of the next five years
 - b. Number of days of operation possible with cash on hand
 - c. Current total amount of available lines of credit not currently being utilized
 - d. Ratio of total assets to total liabilities
 - e. Resources of any affiliated organizations that could be available to support the services described above

3. Data on population that would benefit from services
 - a. Total admissions to each community hospital psychiatric units in the proposed geographic service area that are participating in this initiative July 1, 2011 to June 30, 2012
 - b. Total number of discharges from community psychiatric units to long term care (nursing facilities including those designated as IMDs) that are participating in this initiative between July 1, 2012 to June 30, 2013
 - c. Total presentations to emergency departments participating in this initiative in the geographic area targeted that received a discharge diagnosis of a psychiatric disorder contained in the DHS/DMH target population diagnostic list between July 1, 2011 and June 30, 2012

4. Describe in detail the services you would propose for the area
 - a. TRIAGE:
 - i. Crisis Assessments and Linkage to Services
 1. Which agency would provide these services?
 2. What are the qualifications of the staff that would be involved in providing the services? In supervising the services?
 3. Is the agency certified to bill for Rule 132 Crisis Intervention and Case Management Services?
 4. What structures would be developed to ensure that services are provided where the individual is located (mobility of the service)?
 5. Describe any prior experience in the delivery of this type of service to individuals with mental illnesses.
 6. Describe the data you would collect and processes to monitor the quality of these services and the outcomes of this program

DHS/DMH REQUEST FOR INFORMATION

7. Describe how you would propose funding these services in order to assure accountability for state funds.
- ii. Transportation between Levels of Care
 1. Which agency would provide these services?
 2. How many transports could be in process at one time?
 3. What would be the training requirements for staff completing the transport?
 4. What are the qualifications of staff completing the transportations?
 5. Describe any existing community relationships and others that would need to be developed to ensure that transportation occurs in a timely way to the appropriate service location.
 6. Describe the transport vehicle or vehicles and how they would be acquired and maintained if owned by the agency.
 7. Describe the process which will determine which vehicle will be used for the transport if there are multiple levels of vehicles.
 8. Describe the agency's experience in providing transport services to treatment locations.
 9. Describe the data you would collect and processes to monitor the quality of these services.
 10. Describe how you would propose funding these services in order to assure accountability for state funds.
- b. CRISIS STABILIZATION:
- i. Discharge Linkage and Coordination of Services
 1. Which agency would provide these services?
 2. What partnership agreements would be developed with the community hospitals?
 3. What current relationships exist between the agency and community hospitals?
 4. What are the qualifications of the staff that would be involved in providing the services? In supervising the services?
 5. Is the agency certified to bill for Rule 132 Case Management Services?
 6. What other resources exist within the community that would be utilized to ensure successful community transitions? What partnership agreements will be needed for this to occur? What is the status of current relationships between the involved parties?
 7. Describe in detail the model you would propose to provide this linkage and coordination of services.
 8. Describe the data you would collect and processes to monitor the quality of these services and the outcomes of this program.
 9. Describe any prior experience in the delivery of this type of service to individuals with mental illnesses.
 10. Describe how you would propose funding these services in order to assure accountability for state funds.
 - ii. Outreach to Individuals to Engage in Services

DHS/DMH REQUEST FOR INFORMATION

1. Which agency would provide these services?
2. What are the qualifications of the staff that would be involved in providing the services? In supervising the services?
3. Describe in detail the engagement strategies and model you would propose.
4. Describe any existing community relationships and others that would need to be developed to ensure success.
5. Describe the data you would collect and processes to monitor the quality of these services and the outcomes of this program.
6. Describe prior experience in the delivery of this type of service to individuals with mental illnesses.
7. Describe how you would propose funding these services in order to assure accountability for state funds.

iii. Residential Crisis Beds

1. Which agency would provide these services?
2. What is the proposed location for this program?
3. What are the qualifications of the staff that would be involved in providing the services? In supervising the services?
4. Describe any existing Residential Crisis Bed program operated by the agency.
5. Describe the data you would collect and processes to monitor the quality of these services and the outcomes of this program.
6. Describe how you would propose funding these services in order to assure accountability for state funds.

c. TRANSITIONAL LIVING:

i. Transitional Living Centers

1. Which agency would provide these services?
2. What is the proposed location for the TLC? Is this property currently owned/controlled by the agency, or would it need to be acquired? How would the agency fund the acquisition of the location?
3. How many individuals would be served at any one time?
4. What services and supports would be necessary and available at this site?
5. What are the qualifications of the staff that would be involved in providing the services/supports? In managing the program?
6. What would be the admission criteria into the program?
7. How would individuals served be involved in the policy development and oversight of the program?
8. Describe the relationships that would be necessary to ensure access to community services outside the TLC.
9. Describe the process you would use to assure linkage with permanent housing in the community to assure that this is a transitional living center.
10. Describe how you would define transitional. Describe prior experience in the development of similar services.

DHS/DMH REQUEST FOR INFORMATION

11. Describe the data you would collect and processes to monitor the quality of these services and the outcomes of this program.
 12. Describe how you would propose funding these services in order to assure accountability for state funds.
- ii. Transitional Supervised Residential Settings
1. Which agency would provide these services?
 2. What is the proposed location for the residential setting? Is this property currently owned/controlled by the agency, or would it need to be acquired? How would the agency fund the acquisition of the location?
 3. How many individuals would be served at any one time?
 4. What services and supports would be necessary and available at this site?
 5. What are the qualifications of the staff that would be involved in providing the services/supports? In managing the program?
 6. What would be the admission criteria into the program?
 7. How would individuals served be involved in the policy development and oversight of the program?
 8. Describe the relationships that would be necessary to ensure access to community services outside the residential setting.
 9. Describe the process you would use to assure linkage with permanent housing in the community to assure that this is a transitional residential program.
 10. Describe any existing Supervised Residential program operated by the agency and any prior experience in the development of similar services.
 11. Describe the data you would collect and processes to monitor the quality of these services and the outcomes of this program.
 12. Describe how you would propose funding these services in order to assure accountability for state funds.

DHS/DMH REQUEST FOR INFORMATION

Proposal Due Date and Time: Wednesday, November 13, 2013, 12:00 p.m.

Send one electronic copy (in Microsoft Word) and two paper copies of your response to this Request for Information by the due date and time to:

Jackie Manker, Associate Director
DHS Division of Mental Health
319 E Madison, Ste 3B
Springfield, Illinois 62701
Phone: 217-558-5108
e-mail: Jackie.manker@illinois.gov

Please direct all questions regarding the general procedures for responding to this Request for Information to: dhs.mh@illinois.gov.

DHS/DMH would like to thank your organization in advance for reviewing this Request for Information (RFI).¹ Our community partners and other stakeholders have long constituted the bedrock of the public mental health services available for residents of Illinois. DHS/DMH appreciates your organization's ongoing efforts and values your input into the further evolution of our service model.

¹ This RFI does not constitute any commitment by the State to follow any particular procurement course of action. The RFI is for informational purposes only and may not necessarily result in an award of a contract or an increase in funding of an existing contract. The information provided in response to this RFI is considered the property of the DHS/DMH and will be kept confidential by the DHS/DMH to the extent permitted by law. Information that you provide that you consider to be a trade secret or you consider confidential/proprietary (See section 7(1)(g) of the Illinois Freedom of Information Act 5 ILCS 140/7) must be claimed as such at the time of submission. In addition, a detailed written justification explaining why the provided information is a trade secret or is confidential/proprietary must also be submitted. Please note that the DHS/DMH cannot reimburse community service agencies or other entities for any expenses associated with responding to this RFI

DHS/DMH REQUEST FOR INFORMATION

Appendix B:

Public Act 098-0104 Section 405 ILCS5/6-104.3 Comparable programs for the services contained in the Specialized Mental Health Rehabilitation Act of 2013.

The Division of Mental Health of the Department of Human Services shall oversee the creation of comparable programs for the services contained in the Specialized Mental Health Rehabilitation Act of 2013 for community-based providers to provide the following services:

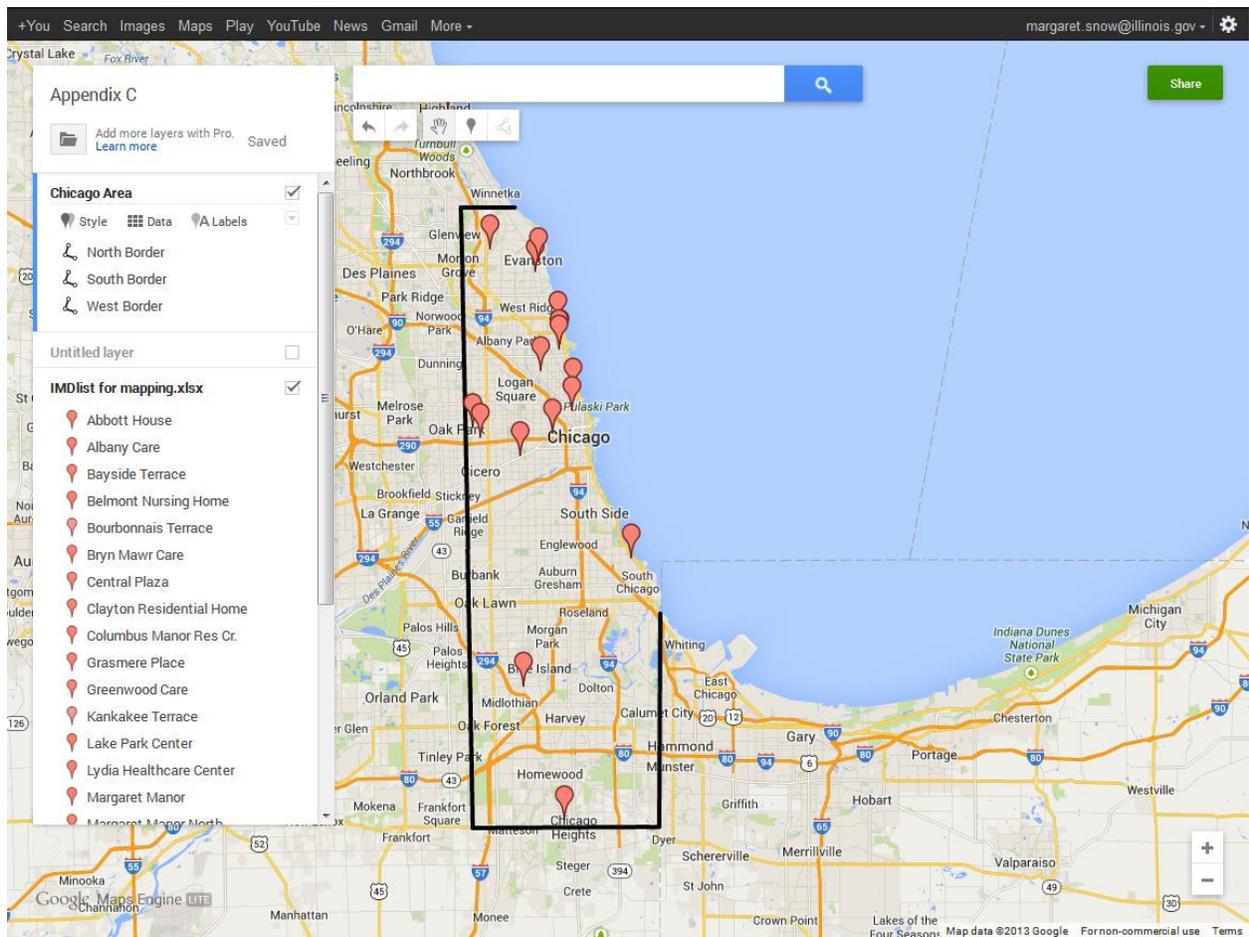

- (1) triage center;*
- (2) crisis stabilization; and*
- (3) transitional living.*

These comparable programs shall operate under the regulations that may currently exist for such programs, or, if no such regulations are in existence, regulations shall be created. The comparable programs shall be provided through a managed care entity, a coordinated care entity, or an accountable care entity. The Department shall work in concert with any managed care entity, care coordination entity, or accountable care entity to gather the data necessary to report and monitor the progress of the services offered under this Section. The services to be provided under this Section shall be subject to a specific appropriation of the General Assembly for the specific purposes of this Section.

The Department shall adopt any emergency rules necessary to implement this Section.

60608	926	62525	771
60611	287	Grand Total	51096
60612	1295		

² Individuals with primary psychiatric diagnoses accounted for approximately 25% of admissions.

³ Geographic areas included in the analysis include Chicago, Suburban Cook, Kankakee, Lake County, Peoria and Macon County (Decatur). Proctor and South Shore Hospital not represented.

⁴ Number of admissions refers to instances, not the unduplicated count of individuals admitted.

DHS/DMH REQUEST FOR INFORMATION

Appendix J:

Primary Psychiatric Diagnostic Groupings⁵ - Psychiatric Admissions to Hospitals in Selected Geographic Areas⁶

FY 2012

Data Source: HFS Claims Data

Primary Diagnostic Group	Number of Psychiatric Admissions to Hospitals ⁷
Adjustment Disorder	232
Anorexia Nervosa	6
Antisocial Personality Disorder	2
Anxiety Disorder	153
Bipolar Disorders	12793
Borderline Personality Disorder	18
Brief Psychotic Disorder	3
Bulimia Nervosa	6
Delusional Disorder	52
Dysthymia	38
Major Depression	6629
Mental Disorders	3809
Post-Traumatic Stress Disorder	156
Psychotic Disorder NOS	1206
Schizophrenia	12290
Substance-Related Disorder	13703
Grand Total	51096

⁵ Individuals with primary psychiatric diagnoses accounted for approximately 25% of admissions

⁶ Geographic areas included in the analysis include Chicago, Suburban Cook, Kankakee, Lake County, Peoria and Macon County (Decatur). Proctor and South Shore Hospital not represented.

⁷ Number of admissions refers to instances, not the unduplicated count of individuals admitted.

DHS/DMH REQUEST FOR INFORMATION

Appendix K:

**Number of Emergency Room Visits of Individuals⁸ with a Primary Psychiatric Diagnosis
FY 2012 Partitioned by Zip Code⁹**

Data Source: HFS Claims Data

Zip Code	ER Visits	Zip Code	ER Visits ¹⁰
60005	470	60613	584
60007	331	60614	340
60010	200	60615	67
