

Resilience

means the personal and community **qualities** that **enable us to rebound from adversity, trauma, tragedy, threats, or other stresses** - and to **go on with life with a sense of mastery, competence, and hope.**

We now understand from research that **resilience is fostered by a positive childhood** and includes **positive individual traits, such as optimism, good problem-solving skills, and treatments.**

Closely knit communities and neighborhoods are also resilient, **providing supports for their members.**
